EDUCATING THE DIGITAL NATIVE

Hampton University School of Nursing
Faculty Institute Presentation
Dr. Shevallanie Lott
January 2, 2020
Objectives

- At the end of this presentation, the participant will be familiar with various methodologies utilized in HUSON
  - Online Learning Consortium (OLC)
  - Nearpod
  - Study.com
  - Articulate
  - Examsoft
is a collaborative community of higher education leaders and innovators, dedicated to advancing quality digital teaching and learning experiences designed to reach and engage the modern learner – anyone, anywhere, anytime.
OLC™
Online Nursing Mastery Series

- One-day onsite workshop
- Three months access to three courses
  - Using Multimedia Instructional Technology to Foster Faculty-Student Engagement
  - Social Learning Theory and Using Social Media to Enhance Learning
  - Transform Your Online Nursing Classroom

NEARPOD is a student engagement platform that can be used to create greater engagement in the classroom. You can create presentations that can contain Quiz's, Polls, Videos, Images, Drawing-Boards, Web Content and so on.
is an online platform that makes education affordable, effective and engaging with short, fun video lessons created by qualified instructors. Over 30 million students a month use our online courses and study tools to master any subject.
ARTICULATE 360

Storyline is a foundational online training software that helps you create online e-learning (interactive) courses quickly and easily.
is that assessment tool, with a combination of streamlined exam creation, secure offline delivery, and immediate data analysis.
Exam Features
The following exam features, if enabled, will be available to students within the assessment.

- Exam Level Attachment
Answer Options:
A: True
B: False

Details:
Question #5 of 14

Shown on the right side of your screen should be an image of a human skeletal system. This is the Question Level Attachment. Click on the image and use it as a 'pop-out' on screen that can be moved to the magnifying glass attachments.
Notes

Question # 2 of 7  ~  FLAG QUESTION

This is an example of an essay question. How does a student submit their assessment?

Essay answer

This is placeholder text for essay...

- Calculator (Basic & Scientific)
5. If a student only selected one answer choice where there was more than one correct answer, the question number in the navigation pane to the left will show a red X. Scoring for such questions will depend on the instructor's settings. Within the answer choices, the student's correct selection will show a green check mark.
Which assessment finding indicates that fluid resuscitation therapy for the client with isotonic dehydration is effective?

**Rationale**

Isotonic dehydration manifests as hypovolemia and shock. The increasing central venous pressure (right atrial pressure/preload) is an indication that the fluid volume deficit is being corrected. Urine specific gravity level change from 1.040 to 1.050 is a sign of worsening dehydration. The change in respiratory rate is not significant to identify a change and the pulse oximetry reading while normal, does not show a change and therefore a decision about improvement of dehydration cannot be determined.
