<td><a href="#">Click here to join the 201 Session</a></td>
</tr>
</tbody>
</table>

* The 101 session will introduce you to the basic features of your Promethean ActivPanel.
* The 201 session will provide advanced techniques to take your use of the ActivPanel to the next level.

Both sessions will provide detailed instructions and technical tips to transform your classroom instruction.

Please click [here](#) to view the 101 training session that was conducted for faculty on May 14, 2021.

Please [Register](#) and complete the 30 minute ActivPanel Titanium Orientation prior to the session. You can also click on [Video Tutorials](#) to learn about specific topics.

Time will be allotted for questions. We look forward to your participation!

Hampton University Center for Information Technology
125 William R. Harvey Hall, Hampton University, 5100 South King Street
Hampton, Virginia 23668-0009

Reminder: Bb Collaborate Ultra Recording Policy

Includes all User Activity Inside Content Areas

As a result of the increased use of Collaborate Ultra in Blackboard, Hampton University has instituted a recording storage policy to remain in compliance with Blackboard’s storage limit as outlined in our contract. This policy will assist CIT with managing the capacity and storage of recorded sessions from Collaborate in order to promote good data retention practice.

A monthly review of storage usage will be carried out by CIT, giving a breakdown by School/Department. It is imperative that each faculty/staff review the report and take immediate action as outlined below.

1. Faculty/Staff should delete recordings from their courses/communities as soon as they are no longer required.
2. Faculty/Staff must download and store recordings they wish to save to their own storage devices or Hampton’s network drive within 30 days of each semester or term.
3. CIT will send a reminder to faculty/staff at the conclusion of each semester/term and one week prior to the start of recording deletions.
4. On the 31st day after the end of each semester/term, CIT will delete recordings. Once content has been deleted CIT will be unable to recover it.
